# Applied DevOps for modern apps with containers and cloud

Jessica Deen  
Azure Avenger, Microsoft

Mathias Olausson  
CTO Solidify

# About Jessica...

Jessica is a Cloud Developer Advocate for Microsoft focusing on Azure, infrastructure, containers, Linux and open source. Prior to joining Microsoft, she spent over a decade as an IT Consultant / Systems Administrator for various corporate and enterprise environments, catering to end users and IT professionals in the San Francisco Bay Area. Jessica holds three Microsoft Certifications (MCP, MSTS, Azure Infrastructure), 3 CompTIA certifications (A+, Network+, and Security+), 4 Apple Certifications, and is a former 4-year Microsoft Most Valuable Professional for Windows and Devices for IT. In 2013, she also achieved her FEMA certification from the U.S Department of Homeland Security, which recognizes her leadership and influence abilities during times of crisis and emergency.

When she's not doing something geeky, you can find her doing something active, most likely running out of breath at her local CrossFit gym or hiking. She also enjoys biking (motorcycles and/or bicycles), shooting, eating, reading, and hanging with her 5-year-old rescue pup.

# About Mathias...

Mathias.Olausson@solidify.se  
@MOlausson

Mathias Olausson is the CTO and co-founder of Solidify, an expert consulting company focusing on helping companies improve their engineering skills. Mathias is a Microsoft MVP, Microsoft ALM Ranger and has published several books on development practices using Visual Studio and VSTS. As a hobby Mathias like to contribute to community add-ons for Visual Studio and VSTS, including the Test Case Explorer.

Mathias is a regular speaker at conferences and runs the Swedish Microsoft ALM and DevOps meetup.

# Agenda

Time	Topic	Presenter
09:00	Intro	Jessica, Mathias
09:15	Containers	Jessica
<i>10:15</i>	<i>Break</i>	
10:45	Containers, part 2	Jessica
<i>11:45</i>	<i>Lunch</i>	
12:45	Intro to Azure DevOps	Mathias
13:00	Azure Pipelines	Mathias
<i>14:00</i>	<i>Break</i>	
14:30	Azure Pipelines, cont.	Mathias
14:45	Release Management	Mathias
15:45	Wrap-up, discussions	Mathias
